### PULLOUT (Back of the Book)

FYI (Find Your Interests)

### Ricky

I'm considering serving in the National Guard or pursuing an ROTC scholarship after high school. The ASVAB CEP helped me find out which military path I want to go for and my job interests in the future.

The ASVAB Career Exploration Program includes a validated aptitude test and interest assessment. The results are used to guide career exploration using our career planning tools. ASVAB CEP is the only career planning resource that allows students to explore multiple paths to success — college, work-based learning, the Military, and the Federal Government — in one place.

## LET'S GET STARTED.

Dear ASVAB CEP Participant,

Maybe you already know exactly what you'd like to do after high school or maybe you have no idea. Either way, the ASVAB Career Exploration Program (CEP) is here to help you navigate the career exploration process.

The ASVAB CEP helps you to discover career options you might like and all the different paths you can take to get those jobs.

Career planning is a lifelong process, and the good news is you're at the best part, the beginning. Even better news, you don't have to have every single step planned out right now, and the first step is simple — **Start exploring!** And don't worry, you are not alone. Your parents, teachers, and mentors are available to guide and support you.

**WANT MORE?**  
[asvabprogram.com](http://asvabprogram.com)

### ACTION STEPS

**LEARN** about yourself — your interests, skills, and values

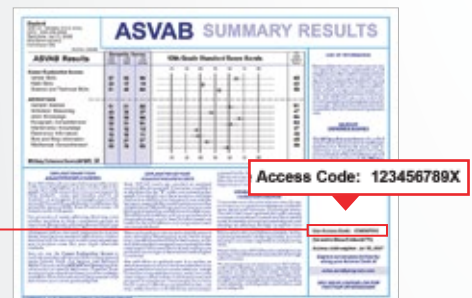

**EXPLORE** careers — find out what it takes to get the types of jobs you like

**PLAN** your future — outline steps toward getting the skills and qualifications you need

The ASVAB CEP is designed to help you:

- Discover your strengths and interests
- Uncover different types of jobs, some you may have never heard of
- Pinpoint skills required for various jobs
- Find out about different education and training options
- Map out how to get where you want to go
- Find your dream job

Everything in this guide, and so much more, is available online. Things are organized so you can easily find what's most important to you. Log in to explore careers that align with your skills and interests, using the access code provided on your ASVAB Summary Results sheet. Find and compare the details about the careers that interest you most so you can decide what you'll need to do to get the job of your dreams.

You can find your access code on your ASVAB Summary Results sheet.

## SKILLS AND ABILITIES

**Anna**

I decided to take the ASVAB test mainly because I am a very indecisive person. I wanted to see what kind of options were still available to me. I still do feel like I am still set on a path for more STEM-related fields.

You may not have the skills for a certain job now, but you can often learn them.

In addition to your interests, your skills and abilities influence your career choices. You can start identifying your skills and abilities now. Think about what you do well. Are there school subjects in which you get particularly good grades? How advanced are your computer skills? Do you speak a foreign language? Identifying your skills and abilities can help you find occupations in which you may be successful. Skills and abilities are not fixed. Although you may not have the skills for a certain job now, you can work toward developing them through education, training, and/or experience. You can do many things to strengthen your skills and abilities or develop new ones.

**Your ASVAB Results**

Your ASVAB scores provide one measure of your skills and abilities. Your ASVAB scores, combined with information about your interests, achievements, and other test results, may help you select appropriate occupations for career exploration. As you explore careers, you can compare your skills with the skill requirements of occupations you are interested in.

**The ASVAB Summary Results**

This sheet reports many scores. (See example on the following page.) On the left of the ASVAB Summary Results sheet, you will find different types of scores.

**1. Career Exploration Scores**

You will receive three Career Exploration Scores. Each of these scores is made up of a combination of some of the individual ASVAB tests. The Verbal Skills score includes Word Knowledge and Paragraph Comprehension. The Math Skills score includes Arithmetic Reasoning and Mathematics Knowledge. The Science and Technical Skills score includes General Science, Electronics Information, and Mechanical Comprehension. These scores show your current strengths and can help you figure out how much you will need to do to get the training and skills you need for a job that interests you.

**2. ASVAB Tests**

You receive a score for each of eight tests that make up the ASVAB. \* Descriptions of each specific ASVAB test are provided on the back of the ASVAB Summary Results sheet.

**3. Military Entrance Score/Armed Forces Qualification Test (AFQT)**

The AFQT score is derived from four ASVAB subtests: Arithmetic Reasoning (AR), Mathematics Knowledge (MK), Paragraph Comprehension (PC), and Word Knowledge (WK). An AFQT score is what the Military will use to determine enlistment eligibility. However, each Service, and each military job, has different requirements, so qualifying AFQT scores can fluctuate.

Each military Service calculates Service-specific composite scores to determine jobs for which you qualify.

**Test Scores**

The Career Exploration Scores and ASVAB Test Scores are reported as percentile scores and standard scores.

**Percentile Scores**

The percentile scores shown on your sheet indicate how well you did in relation to others in your grade and are **not** the same as percent correct. For example, a percentile score of 65 would mean that you scored the same as or better than 65 percent of students in your grade who took the test.

You will notice three percentile scores:

1. Your percentile as compared with others of your gender.

---

2. Your percentile score compared to those of the opposite gender.

---

3. Your percentile in comparison to all others in your grade. These scores are the ones you will use for career exploration.

\*If you take the computer-adaptive version of the ASVAB (CEP iCAT), you will receive scores for nine tests. See [asvabprogram.com](http://asvabprogram.com) for details.

ASVAB Results	Percentile Scores			12th Grade Standard Score Bands	12th Grade Standard Score
	12th Grade Females	12th Grade Males	12th Grade Students		
<b>Career Exploration Scores</b>					
Verbal Skills	97	95	96	65	65
Math Skills	22	17	19	42	42
Science and Technical Skills	81	48	64	53	53
<b>ASVAB Tests</b>					
General Science	91	81	86	61	61
Arithmetic Reasoning	43	30	37	47	47
Word Knowledge	98	95	96	66	66
Paragraph Comprehension	92	91	91	62	62
Mathematics Knowledge	14	12	13	37	37
Electronics Information	13	10	11	38	38
Auto and Shop Information	53	21	37	45	45
Mechanical Comprehension	95	76	85	59	59
<b>Military Entrance Score (AFQT)</b>	<b>57</b>				

Your ASVAB scores can help you see what your current strengths are.

### Standard Scores

Your standard scores show how well you did in relation to the average scores of others who have taken the ASVAB tests. They are not like scores you are used to seeing in school; rather, the scores typically range from 30 to 70, with 70 being a very high score. You will also notice that the scores for these tests are displayed using gray score bands. Test scores are never an exact measure of your skills and abilities. If you took the ASVAB again, your scores might change somewhat. Score bands show you the range that your scores would probably fall in if you took the test again.

### Using Your Scores

Your ASVAB results provide information on your current levels of skills and abilities. These scores do not predict success or failure. Just as a high score does not guarantee success, a low score does not necessarily mean failure in an occupation. In addition, you can work toward improving your skills through training and/or experience. The OCCU-Find in this guide provides information about many aspects of occupations, including the importance of verbal, math, and science/technical skills. When you compare your skills against the OCCU-Find information, keep in mind that you will need additional training before entering most occupations. Training may include college education or vocational training. You can also explore opportunities outside of your school such as finding a mentor or volunteering in a given field. Trying out new things is a great way to increase confidence in a given area.

### How Can You Improve Your Scores?

If your scores on the ASVAB were lower than you expected, you should ask yourself why. For example, you may not have had the opportunity to develop some of the skills tested by the ASVAB. You may want to talk to your counselor or teachers for suggestions on how to improve your skills.

#### Some ways to develop skills and confidence:

- Volunteer in a career of interest
- Take additional classes
- “Shadow” or interview someone in a given career about their job
- Get an internship
- Find information at the library or on the Internet

## PART 1:

### Steven

I wanted to see what was going to be on the ASVAB to see what career options I have in the future. Taking the test enabled me to see what areas I can improve on if I decide to retake the test in the future.

Grades and test scores are only part of the picture. Many other factors are important in determining which occupations will bring you success and fulfillment.

Some people try to make decisions about college or careers before they have spent time thinking about their own interests, values, talents, and abilities. This can result in wasted time, money, and effort.

Understanding your work-related interests can help you determine potentially satisfying career options.

Work-related interests are also important to your career development and overall happiness. Working in an occupation that interests you makes it easier to work harder and advance in a career.

The first step toward exploring careers is to spend some time finding out about you.

**What are your likes?**  
**What are your strengths?**

## TAKE THE FYI

To start identifying your interests, take the interest inventory, Find Your Interests (FYI).

You can find the FYI at the back of this guide or online at [asvabprogram.com](http://asvabprogram.com). Then, use your FYI results to explore careers.

When you take an interest inventory, you are not selecting specific occupations. You are providing information about your likes and dislikes.

- 1 First, turn to the back of this booklet to find your copy of the FYI or go to [asvabprogram.com](http://asvabprogram.com)
- 2 Read the directions carefully
- 3 Complete the FYI
- 4 Return to this section to read more about your scores and find information about the six interest areas

If you are taking the FYI online, the scoring will be done for you. Each time you log in you will see your Top Interest Codes.

## UNDERSTANDING YOUR FYI SCORES

After taking the FYI, you will have a set of Raw Scores and Top Interest Codes. Open your FYI to the last page, which shows your FYI scores. Keep this page in front of you as you go through this section.

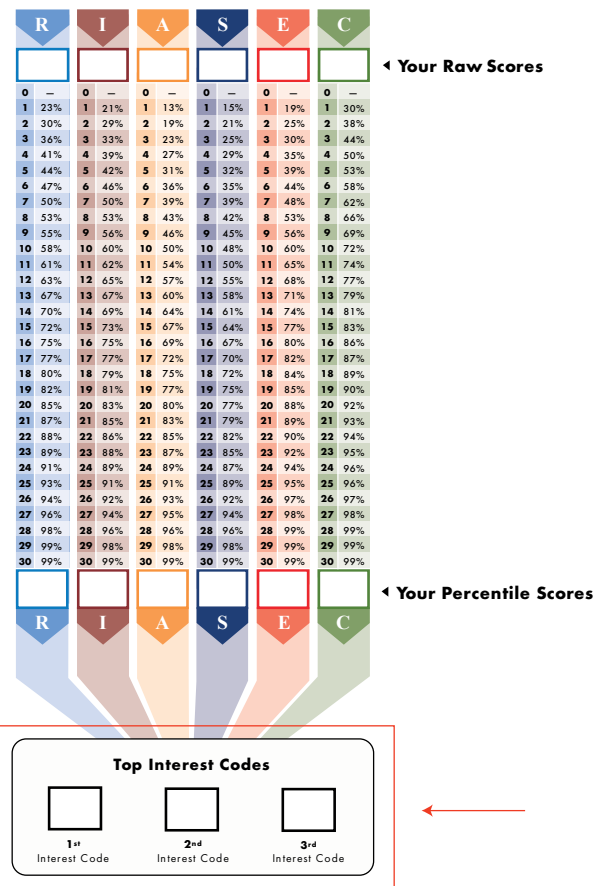

Each of your Top Interest Codes represents one of six interest areas that can be used to describe your likes and dislikes. Your Top Interest Codes show your three strongest interest areas based on how your scores compare with the scores of high school students who have taken the FYI.

The first letter in your Code indicates your strongest interest area; the next letter, your second strongest interest; and the third letter is the area in which you have some interest, but probably not as much as in the first two areas. If you have Interest Codes that are tied or are very close together, they probably are equally important.

To get a better understanding of what your Interest Codes mean, read the descriptions of each interest area on pages 4-5.

Keep in mind that your Interest Codes indicate your interest areas at this time in your life. As you mature and gain more experience and exposure to new activities over time, your Top Interest Codes may change.

Last page from the FYI

### The Six Interest Areas

In many cases, a person's Top Interest Codes are located near each other on the hexagon. For example, if a person's first Interest Code is C, their second and third Codes are likely to be R and E.

John L. Holland, Ph.D.

## REALISTIC

Realistic individuals prefer work activities that include practical, hands-on problems and solutions, such as designing, building, and repairing machinery. They tend to enjoy working outside with plants and animals or using tools and machinery. **Realistic types generally prefer to work with things rather than people.**

Realistic occupations generally require workers to have physical and mechanical abilities.

### Examples of Realistic occupations include:

- Anesthesiologist Assistant
- Broadcast Technician
- Construction and Building Inspector
- Cook
- Dental Laboratory Technician

The OCCU-Find lists many more Realistic occupations on pages 12-19.

## INVESTIGATIVE

Investigative individuals prefer analytical or intellectual activities such as reading, studying, investigating, evaluating, and problem solving. **Investigative types generally prefer to work with ideas rather than with people or things.**

Investigative occupations generally require workers to have mathematical and scientific abilities.

### Examples of Investigative occupations include:

- Anthropologist
- Biomedical Engineer
- Chemist
- Computer System Architect
- Dentist

The OCCU-Find lists many more Investigative occupations on pages 20-22.

## ARTISTIC

Artistic individuals prefer work that involves expressing oneself in original activities like writing, dancing, singing, sculpting, and painting. **Artistic types tend to enjoy working in a setting where the work can be done without following a clear set of rules.**

Artistic occupations generally require workers to have artistic abilities and good imaginations.

### Examples of Artistic occupations include:

- Actor
- Architect
- Broadcast Announcer
- Cartoonist
- Hairstylist

The OCCU-Find lists many more Artistic occupations on pages 23.

## SOCIAL

Social individuals generally like activities that involve personal interaction with people, such as helping, teaching, counseling, or otherwise being of service to others. *Social types prefer to work with people rather than to work with objects, machines, or data.*

Social occupations generally require personal interaction and communication skills and abilities.

### Examples of Social occupations include:

- Athletic Trainer
- Child Care Worker
- Clergy
- Coach/Scout
- Community Health Worker

The OCCU-Find lists many more Social occupations on pages 24-26.

## ENTERPRISING

Enterprising individuals prefer work that involves persuading, influencing, and directing others and are often interested in economics and politics. They enjoy work activities such as sales, supervision, and project or business management. They like work that is fast-paced, requires a lot of responsibility and decision-making, and requires taking risks for profit.

*Enterprising types prefer to work with people and ideas rather than things.*

Enterprising occupations generally require workers to have leadership, sales, and speaking abilities.

### Examples of Enterprising occupations include:

- Advertising Sales Agent
- Air Traffic Controller
- Chief Executive
- Detective/Criminal Investigator
- Lawyer

The OCCU-Find lists many more Enterprising occupations on pages 27-30.

## CONVENTIONAL

Conventional individuals tend to prefer work activities that involve establishing or maintaining orderly and accurate records, procedures, and routines. They like working with things, data, or machines and applying precise standards in a setting where there is a clear line of authority. *Conventional types prefer working with data and details more than with ideas.*

Conventional occupations generally require workers to have clerical, organizational, and arithmetic abilities.

### Examples of Conventional occupations include:

- Accountant and Auditor
- Cashiers
- Court Reporter
- Energy Auditor
- Mail Carrier

The OCCU-Find lists many more Conventional occupations on pages 30-32.

## WORK VALUES

You can take an assessment on [asvabprogram.com](http://asvabprogram.com) to identify which work values are most important to you (see Table 1-1). The six work values included in this assessment, along with their corresponding work-related needs, are described in Table 1-1. You can then search for careers online that may satisfy those work values.

Table 1-1. Work Values Assessment

WORK VALUE	DEFINITION: WORKERS IN THIS JOB
 Achievement	Make use of their individual abilities. Get a feeling of accomplishment.
 Working Conditions	Are busy all the time. Do their work alone. Have something different to do every day. Are paid comparably for the work they do. Have steady employment. Have good working conditions.
 Recognition	Have opportunities for advancement. Receive recognition for the work they do. Give directions and instructions to others. Are looked up to by others in their company and their community.
 Relationships	Give directions and instructions to others. Have work where they do things for other people. Are never pressured to do things that go against their sense of right and wrong.
 Support	Are treated fairly by the company. Have supervisors who back up their workers with management. Have supervisors who train their workers well.
 Independence	Try out their own ideas. Make decisions on their own. Plan their work with little supervision.

### What matters to you?

Just like your interests, your work values may change. For example, the desire for work involving lots of travel might change after having a family.

The extent to which your work values are met by a particular job can be affected by the type of employer you select.

## TYPES OF EMPLOYERS

Some work values are associated with general career fields or occupations, while others, such as prestige or flexible hours, are linked to specific jobs or employers. For some people, job satisfaction comes from performing the work itself; for others, it is a result of factors such as the work environment or earning potential.

Another factor to consider when you enter the world of work is the type of employer for which you wish to work. Depending on the nature of the work, the type of employer that you choose sometimes impacts how closely the job fits with your interests and values. Once you select a career field, you will then begin to search for a job within a particular organization. In the majority of career fields, jobs exist in both the government and private sectors.

You can choose to work for a small business; a large corporation; federal, state, or local government; or, the Military. You can also choose to be self-employed.

A physician, for instance, can work in private practice, for a hospital, or for the Military. If you use your interests and work values to help choose a career and employer, you are likely to be happier in your choice. A physician with a high Enterprising score, for example, might get more job satisfaction from working in private practice, while a physician who values job security and benefits may prefer working for an a Health Maintenance Organization (HMO). In other career fields, a small business may provide the opportunity for independent work, whereas a larger organization, such as a corporation or the Military, may provide more opportunities for formal training and advancement.

## HOW TO GET THERE

One aspect of learning about yourself is to consider how much training and/or education you are willing to invest in to prepare for a career. Career field entry can happen via many pathways. Alternatives to traditional education, such as work-based learning, the Military, or the Federal Government, allow individuals to obtain the experience needed for a career.

Skill attainment is a lifelong process. Many people now choose to combine their education with work experience. For instance, instead of attending a four-year college immediately after high school, some people get a two-year degree in a particular field and then enter the job force. At some point, they may choose to complete a certificate program or a four-year degree.

There are a variety of occupations and career paths that you can pursue with different levels of education. Two-year degrees and certificate programs can help you enter some of the fastest growing occupations. Don't rule out a given career field simply because you think that the educational requirements might be more than what you would like to pursue after high school.

The best place to explore the various pathways available to you is on [asvabprogram.com](http://asvabprogram.com). Each career detail page found there includes comprehensive information, including information on pathways to get there through education, credentialing and licensing, military services offering the occupation, and federal employment opportunities.

Did you know many of the fastest growing occupations don't require a traditional four-year degree?

### Education

Universities and colleges provide a variety of educational opportunities, not just two- and four-year degrees.

#### **Program options available may include:**

- Certificate programs
- Two-year/associate degree programs
- Four-year/bachelor degree programs
- Graduate/advanced degree programs
- Continuing education programs

### Work-based Learning

Career and Technical Education (CTE) programs offer instruction and hands-on experience in a given trade or profession (e.g., auto repair, carpentry, commercial truck driving, culinary arts, computer-based careers). The length of time required to obtain a certificate or a degree varies, depending on the specific program.

#### **Training may include:**

- Certificate programs
- Associate degrees
- Continuing education

### Military

You can find virtually all occupations in the Military. Also, you'll get world-class training to develop skills that you can even use in the civilian world.

When you explore the OCCU-Find online, you will be able to see which Services offer the job and learn more details about it.

### Federal Government

Another option that's available as a post-secondary path is federal government occupations. On the OCCU-Find online, you can explore federal government opportunities related to a job. A link to USAJOBS is provided when there are any current job openings in that career field.

#### **Both the Military and Federal Government offer training opportunities including:**

- Certificate programs
- Continuing education
- On-the-job training
- Industry-specific training
- Internships
- Apprenticeships
- Mentoring/coaching

## One Job – Two Ways To Get There

### **Nina Network Engineer**

I've always been interested in computers, so my mom encouraged me to take some programming classes in high school. The school counselor helped me find a college known for its technical and engineering courses. After getting my degree, I began working for a large consulting firm doing network support. Along with on-the-job training, my firm has sent me to several seminars and certification programs to keep current with the latest technologies. I'm planning on returning to college to get an advanced degree.

### **Jason Information Systems Technician**

Like my dad, I joined the Navy right after high school. For me, I was attracted to military service for many reasons including the education and training benefits. Right now, the Navy is paying for me to participate in a 14-month network engineering program at a local community college. Even without this program I have already gained real-world experience I couldn't get anywhere else. And, if I decide to leave the Navy, I have in-demand skills I can transfer to a civilian job like network engineer.

## THE OCCU-FIND

Now that you've gotten to know yourself better, you are ready to explore different career options. This section describes how you can use the ASVAB CEP to explore and plan for a career that is right for you.

Chances for a rewarding career are improved if you select a career field consistent with your interests, values, and skills.

You have identified your interests, reviewed your ASVAB scores, and thought about your work values. Now you can begin exploring the world of work to find appealing occupations. The OCCU-Find in this guide organizes occupations by Interest Codes and shows the importance of skills for nearly 1,000 occupations. But your career exploration doesn't end here. Identify occupations that appeal to you and then explore them further. As you explore occupations in line with your interests and skills, you will gain career exploration experience that will last a lifetime.

### You Have

**ASVAB Career Exploration Scores.** These scores tell you your strengths in three broad skill areas: verbal, math, and science/technical. These percentile scores show your current strengths as compared to others in your grade.

**Interest Codes.** Your Interest Codes tell you about your strongest interest areas. Your interests should drive your career exploration.

### The OCCU-Find Provides

**Skill Importance Ratings.** The OCCU-Find\* provides information on the importance of verbal, math, and science/technical skills for nearly 1,000 occupations listed across all six interest areas. The information presented is general and does not mean that you need a certain level of skills (as measured by your ASVAB scores) to qualify for the occupation. There is no direct comparison between your Career Exploration Scores and these ratings. Rather, these ratings show the relative importance of Verbal, Math, and Science/Technical skills for performing the job. The Skill Importance Ratings are not the same as Career Exploration Scores, but can be used to evaluate suitability for the job.

### Using the Information to Explore Careers

Use the OCCU-Find to identify occupations that interest you.

Look at the skill importance ratings. These stars reflect the relative importance of the skill set for the occupation. You will see the information like this:

- ★★★★ **Very important** to the job (critical for job performance)
- ★★★☆☆ **Moderately important** to the job (used regularly on the job)
- ★☆☆☆☆ **Less important** to the job (not an integral part of job tasks)

If a skill set is very important for a job, what do you need to do to gain those necessary skills? What further education, on-the-job training, or Career Technical Education (CTE) training might you need? Are you taking classes that will help you develop the important skills for the occupation?

Go to the ASVAB CEP website, [asvabprogram.com](http://asvabprogram.com), to research more information about each occupation. The website contains information about each job, such as task descriptions, work environment, training provided, and employment opportunities. Then ask yourself, "Does this occupation appeal to me? How well does it fit with my interests and values? The answers to these questions can help you narrow down your choices.

You will get an access code on your ASVAB Summary Results sheet. Then you can go to [asvabprogram.com](http://asvabprogram.com) and use your access code to access an expanded OCCU-Find.

\*The primary source of data contained within the OCCU-Find is the O\*NET database ([www.onetonline.org](http://www.onetonline.org)).

# INSTRUCTIONS FOR USING THE OCCU-FIND

## Interest Codes

The OCCU-Find in this guide is organized by the six Interest Code areas. Each Interest Code area has 1-8 pages of occupations. The OCCU-Find provides a list of occupations for each Interest Code. For example, pages 12-19 show occupations that are primarily Realistic. You will also see the second and third Interest Codes associated with each occupation.

## Skill Importance Ratings

This column shows the relative importance of verbal, math, and science/technical skills to occupations.

## REALISTIC OCCUPATIONS

**Directions:** In the Explore Further column, check the occupation(s) that interest you. Access more career details at [asvabprogram.com](http://asvabprogram.com).

Explore Further	Occupational Titles	Interest Code		Skill Importance Ratings		
		2nd	3rd	Verbal	Math	Science /Tech
<input type="checkbox"/>	Computer Network Support Specialists	E	C	★★★★○	★★○○○	★★★★
<input type="checkbox"/>	Computer User Support Specialists	C	I	★★★★	★★○○○	★★★★
<input type="checkbox"/>	Telecommunications Engineering Specialists	E	C	★★★★	★★○○○	★★★★
<input type="checkbox"/>	Cartographers and Photogrammetrists	C	I	★★○○○	★★★★	★★★★○

★★★★★ **Very important**

★★★★☆ **Moderately important**

★★★☆☆ **Less important**

Skill importance describes how often these skills are used in the occupation. If your strengths align with these ratings, you are already preparing for success in this job.

## Explore Further

Place a checkmark in the box if you want to find out more about that Occupational title at [asvabprogram.com](http://asvabprogram.com).

## Occupational Titles

These jobs are associated with the primary interest area shown at the top of the column.

## Record Your Results Here.

### 1. Enter your ASVAB Scores here.

From your ASVAB Summary Results sheet, enter your Career Exploration Scores. Use the percentile scores as compared to all students in your grade. These scores provide a snapshot of where you stand relative to others.

Verbal	Math	Science/ Technical
<input type="text"/>	<input type="text"/>	<input type="text"/>

### 2. Enter your Top Interest Codes from the FYI here.

1 <sup>st</sup> Interest Code	2 <sup>nd</sup> Interest Code	3 <sup>rd</sup> Interest Code
<input type="text"/>	<input type="text"/>	<input type="text"/>

### 3. Turn to the pages of the OCCU-Find that show occupations for your 1st Interest Code.

**Realistic** occupations ..... pages 12-19  
**Investigative** occupations ..... pages 20-22  
**Artistic** occupations ..... pages 23

**Social** occupations ..... pages 24-26  
**Enterprising** occupations ..... pages 27-30  
**Conventional** occupations ..... pages 30-32

# REALISTIC OCCUPATIONS

**Directions:** In the Explore Further column, check the occupation(s) that interest you. Access more career details at [asvabprogram.com](http://asvabprogram.com).

**PART 3:**

**MAKE A PLAN!**

Keep these “action steps” in mind as you continue your career exploration:

Talk to your parents, teachers, and counselor about taking steps to prepare for a career. They can help you choose courses or perhaps find job shadowing opportunities. Other steps you can take include:

**STEPS**

**WHAT DO I DO?**

**Research**

Research the occupation(s) you have identified. Determine what skills, education, and experience are required.

**Explore**

Look at related careers, especially those that involve different education or training requirements.

**Talk**

Talk with your parents and/or school counselor about your options.

**Experiment**

Try out occupations that you like most by volunteering or serving as an apprentice.

**Interview**

Set up interviews with individuals in your occupations of interest. These might be people you know already (your friends’ parents, for example) or people whom you’ve read about.

**Plan**

Go to **asvabprogram.com** and log in to access career planning tools, which help you build the action steps required to achieve your goals so you can evaluate your options and decide which path is right for you. You can build multiple Career Plans to help you evaluate the time and resources needed to enter the career of your dreams. When building Career Plans tasks can be added to the Calendar to help participants track important dates and deadlines. The Portfolio is a resume builder that gives participants a place to document their achievements and customize their resume so that it stands out.

Career exploration does not stop here. Access all of the career planning tools at **asvabprogram.com**.

This guide helps you learn about your skills, interests, work values, and occupations you might want to pursue. As your values and interests change, your occupational interests may also change. You can use the skills and concepts you have learned here in the future as you continue exploring careers.
